

AGTSI has a range of parts for all models of GE LM2500, LM5000, LM6000 and LMS100 engines, as well as Pratt & Whitney's GG4/FT4.

All In A Decade

AGTSI celebrates 10 years

➤ Aeroderivative Gas Turbine Support Inc. (AGTSI) is celebrating 10 years as worldwide supplier of GE gas turbine parts. The Boca Raton, Florida, U.S.A.-headquartered company provides a variety of parts, ranging from actuators and accelerometers to seal rings and valves. This includes on-engine, off-engine and package parts for all models of

General Electric LM2500, LM5000, LM6000 and LMS100 engines, as well as Pratt & Whitney's GG4/FT4.

"Building a business doesn't happen overnight," said Alan Mibab, president of AGTSI.

Mibab spent his first year working out of his home, taking orders and stockpiling parts within his living quarters. "I'm very happy when I look back to what we have grown from," Mibab said. "I'm proud of my own and everyone else's efforts and the customers for giving us a chance and helping us grow."

The company's current location features a 1000 m² warehouse and 500 m² of office space. What began as a one-man operation in 2004 has grown into a 14-person team that is available 24 hours a day, 365 days a year, with an on-call service for its customers. "Every call placed to the company is answered by a company representative, not an automated assistant," Mibab said. "Parts can be shipped overnight or through ground service."

An expansive inventory of spares and replacement parts for all aeroderivative gas turbine technologies is maintained in the company's warehouse.

Mibab said AGTSI built up its inventory one product at a time based on customer demand. We've slowly and steadily grown every year. I definitely see future growth. It won't be handed to us. We have to work for it." ♥
